

Trees 'do pose a risk'

Is Christine Magnusson barking up the wrong pine-tree again? (Your View, June 10).

The risk posed by six of the 850 pine trees in Cook Park has now been confirmed by Claims Management Australasia Pty Ltd. The recommendation to replace them was endorsed by both a risk assessment report and council .

I'm pleased that the cost to replace the dying ones with seven-metre tall healthy pines will be less than half originally reported. Overall, this is a very positive outcome for our community.
