

King Street Work Begins

The Mayor of the City of Rockdale, Councillor John Flowers was turning the first plod of dirt to celebrate the beginning of the King Street upgrade. Councillors Bill Saravinovski and Gary Green were also present on this momentous occasion.

As part of Council's Thriving Town Centre program, King Street in Rockdale is the first local town centre to receive a refurbishment. The upgrade will include a paved mall for pedestrians, trees, a playground, improved lighting and new seating. The upgrade will be more pedestrian friendly and will add to the street's already thriving cosmopolitan feel. The King Street project is due to be finished in May 2008.

The Mayor was delighted to see the work begin:

"The upgrade will really improve this area. On behalf of Council I can say we are very excited to see this project unfold. The benefits to both businesses and customers in King Street are countless," the Mayor said.

The Mayor with Councillors Bill Saravinovski and Gary Green declare the King Street upgrade under way.
